

Want Superfast Broadband?

Register your demand by completing the community and business survey online at
www.superfastnorthamptonshire.net

The importance of Superfast Broadband

The internet is central to modern day life. Superfast Broadband provides a faster more convenient way to access leading-edge software and applications and will **benefit local businesses, education and home life.**

Why do we need this information?

The County Council is inviting local communities and businesses to co-ordinate and complete surveys which will help us to identify hot spots of demand for superfast broadband in the county. The results from these surveys will be compiled and published **to help stimulate interest from the broadband market to invest in Northamptonshire.**

How can you help?

We need as much information as possible so please spread the message about the broadband surveys and the importance of registering demand. **The more information we have, the stronger the message to the broadband market!** This will help us to achieve the targets for full superfast coverage by 2017 as set out in the Northamptonshire Next Generation Strategy.

The deadline for response is 30th September 2013

To request a hard copy of the Community or Business survey please email; bigidea@northamptonshire.gov.uk
